### Key Rating Drivers

**Ratings Equalised with Hamburg:** Hamburgische Investitions-und Foerderbank's (IFB Hamburg) Issuer Default Ratings (IDRs) are equalised with that of the bank's owner and guarantor, the State of Hamburg (Hamburg; AAA/Stable). Hamburg's creditworthiness is underpinned by the strength of the German solidarity system, which links the creditworthiness of the German federal states to that of the Federal Republic of Germany.

**Strong Support Mechanism:** IFB Hamburg maintains a statutory guarantor liability (Gewehrtraegerhaftung) from Hamburg for all of its obligations. The owner's institutional liability (Anstaltslast) ensures its continuation as an economic entity. All of the bank's liabilities are covered by a direct, unconditional and explicit refinancing guarantee. Hamburg is also statutorily obliged to cover IFB Hamburg's losses, should they occur. Specific legislation exempts the bank from insolvency procedures; it can only be dissolved by law.

**Focus on Promotional Housing:** IFB Hamburg is a regional German development bank, and fulfils a specific policy function. It provides funding for economic, social, municipal, infrastructure and environmental projects in Hamburg. The vast majority of its loans relate to affordable housing activities. The bank takes on special tasks as requested by its owner and, to a smaller extent, participates in projects initiated by other European development institutions.

**Low Non-Performing Loans:** A low-risk appetite and adequate collateralisation of housing loans underpin the bank's strong asset quality and a low level of non-performing loans or overdue payments. However, IFB Hamburg's asset quality would suffer from a pronounced real estate crisis in the region. The bank's securities portfolio for liquidity purposes is of high quality.

**Non-Profit Orientation:** Profit maximisation is of minor relevance to IFB Hamburg. Statutory loss absorption and a contractual compensation mechanism (on interest rates) ensure a sustainably balanced financial performance and allow it to conduct its promotional activities.

**Regulation Could Affect Capitalisation:** IFB Hamburg's capitalisation is protected by the statutory loss absorption. The bank's solid common equity Tier 1 ratio of 23.5% at end-2018 provides material flexibility for regulatory changes, such as revisions to the Basel III framework. Its leverage ratio of 14.5% at end-2018 compares well with that of its peers.

**Funding Benefits from Guarantee:** IFB Hamburg is wholesale-funded, including funds obtained from state-owned development bank KfW (AAA/Stable). The 0% regulatory risk-weighting of its liabilities reflects Hamburg's explicit state guarantee and provides the bank with privileged access to the debt capital markets. Its liquidity is sound and underpinned by a large pool of unencumbered assets. Hamburg can act as a liquidity provider of last resort.

### Rating Sensitivities

**Guarantor's Ratings:** The bank's IDRs are sensitive to a change in Fitch Ratings' assumptions about the owner's support, specifically a downgrade of Hamburg, or a change in the terms of the state guarantees. The Stable Outlook reflects our view that the nature of state support is unlikely to change significantly in the medium term. This is due to the strategic importance of IFB Hamburg to the local economy and its entrenchment in the regional financial system.

## Support

### Ratings Reflect Strength of Support Mechanism

IFB Hamburg's IDRs reflect the bank's policy role and the explicit support commitment of the federal state, Hamburg, provided through three formal support arrangements. The federal state has an institutional liability (Anstaltslast), which obliges it to ensure the bank's continued operation in the event of financial difficulties. IFB Hamburg also carries a statutory liability (Gewährträgerhaftung) of its owner. This obliges the guarantor to provide support in the event of insolvency or liquidation of the bank, if the assets of the bank do not cover the creditors' claims.

In addition, IFB Hamburg's liabilities are covered by a direct, explicit and unconditional guarantee from Hamburg. The guarantee is stipulated in IFB Hamburg's governing law and is unlimited in terms of volume and duration. A creditor can directly present his claims against IFB Hamburg to Hamburg based on the guarantee.

Unlike guarantors of other peer development banks, Hamburg has a statutory obligation to cover IFB Hamburg's losses in a financial year, should they occur.

IFB Hamburg's state support is compatible with EU competition rules, because it is engaged in non-competitive business only. An agreement from 2002 between the German federal government and the European Commission allows German public-sector development banks to continue receiving state support for their development business. This applies as long as the banks' activities remain purely promotional and non-competitive.

### German Federal States' Solidarity System Drives Hamburg's 'AAA' Rating

Hamburg's ratings reflect the stability and sustainability of the solidarity system for German federal states. The German government and the federal states are jointly responsible for supporting states that face financial hardship, in line with the German constitution. The federal states share equal responsibilities and must be financially able to fulfil their constitutional duties while exercising their right of autonomy.

### Banking Reform Exempts IFB Hamburg from CRD

In April 2019, the EU's Economic and Financial Affairs Council agreed on a banking reform package. It excludes German development banks from the scope of the Capital Requirements Directive V and the CRR, due to their specific business model with effect from 27 June 2019. However, certain provisions linked to Article 1a of the German Banking Act, which defines financial services institutions, remain in place, for example capital and liquidity requirements.

The amended Article 46f of the German Banking Act, in force since July 2018, allows German banks to issue two classes of senior unsecured bonds, preferred and non-preferred. However, it does not apply to banks that are insolvency-remote by law, which includes IFB Hamburg. This is because the difference in ranking of preferred and non-preferred obligations applies on insolvency.

## Operating Environment

### Hamburg is a Prosperous Region

Hamburg's GDP increased by 1.7% in real terms in 2018 and moderately exceeded the nationwide average of 1.4%. Its GDP per capita of EUR65,603 in 2018 is the highest among German states and substantially above Germany's average. This is due to its city-state status, which reflects a high density of inhabitants, and its wealthy economy. Hamburg's economic profile is largely determined by a broad services sector (media, IT, tourism and insurance) and trade (third-biggest container harbour in Europe). IFB Hamburg's end-2018 balance-sheet size was equivalent to 4.5% of Hamburg's GDP.

## Related Criteria

[Bank Rating Criteria \(October 2018\)](#)

[Short-Term Ratings Criteria \(May 2019\)](#)

## Company Profile

### Business Model Determined by the Policy Mandate

The bank's governing law narrowly specifies its mandate with a focus on the promotion of and support for Hamburg's economic, social and structural public duties. IFB Hamburg is a member of the Compensation Scheme and Deposit Protection Fund of the Association of German Public Sector Banks.

IFB Hamburg is the legal successor of Hamburgische Wohnungsbaukreditanstalt, a public law institution established in 1953, with the primary role to finance and develop the residential housing sector in the post-war years. IFB Hamburg was established on 1 August 2013 to cover a broader scope of promotional activities, including support for smaller enterprises and business start-ups through loans, subsidies and guarantees. IFB Hamburg provides funding to start-ups through a subsidiary.

### Focus on Real Estate Borrowers in Hamburg

Given its origin, the real estate segment is IFB Hamburg's most important business line and represents 95% of its loan exposure as of 1H19. The 'economy and environment' segment has a total volume of EUR280 million or 5% of its total loan exposure and the 'Innovation' segment's share is at this stage negligible at just EUR3.1 million at end-1H19. The bank reported EUR738.5 million of new promotional business volume in 2018 of which about 35% comprised subsidies rather than promotional loans.

## Management and Strategy

### Legal Framework Defines Strategic Objectives

IFB Hamburg's legal framework and statutes determine its strategic objectives and business principles. The bank cooperates closely with its owner through an annual business and budgetary planning process, which feeds directly into Hamburg's financial planning. A monthly controlling process reviews actual and budgeted developments. IFB Hamburg complies with the regional Hamburg Governance Code.

IFB Hamburg has two board members and is supported by an advisory council, a dedicated risk and audit committee and a governance council for innovation. Its chief executive officer has been a board member since 2007 and has been in its current role since 2010.

## Risk Appetite

### Conservative Risk Strategy in Line with Mandate; Adequate Risk Control

IFB Hamburg's risk appetite is low and limited to the risks inherent in its policy role, and the bank has no incentive to increase its risk appetite to generate additional financial returns. This is different from other German regional development banks, which generally aim to generate sufficient earnings on their own to conduct their promotional activities and strengthen their capital, without relying on regular financial contributions from their owners.

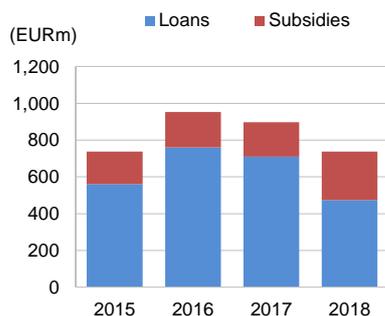

As a result, IFB Hamburg's security portfolio, used for liquidity management purposes only, is smaller in relation to its total assets (5% at end-2018) than at other development bank peers, which often rely on their securities portfolios for income generation.

IFB Hamburg manages its real estate loans primarily through direct secured lending. Its SME loans are granted generally through the borrowers' main commercial banks, which assume the credit risk on a pass-through principle. However, the share of pass-through loans is very low compared with that of peers, accounting for less than 3% of its total loans at end-2018.

### Volatile Interest Rate Risk in the Banking Book

IFB Hamburg does not undertake material trading activity and interest-rate risk is IFB Hamburg's only material market risk as its long-term lending drives maturity mismatches. The bank uses derivatives to hedge interest-rate risk in its banking book.

### Promotional volume

Source: Fitch Ratings, HIFB

At end-2018, a 200bp parallel upward shift of the yield curve would have reduced the present value of the banking book by the equivalent of 5.8% of its own funds, which is moderate and well below the 20% regulatory threshold for market risk. However, this figure can be temporarily volatile and IFB Hamburg reported an equivalent of 10.1% of its own funds at end-1H19.

### Low-Risk Appetite in Securities Portfolio

Fitch views the bank's investment strategy as conservative, with a focus on highly rated senior preferred and covered bonds as well as sovereign and sub-sovereign issuers. IFB Hamburg does not invest in corporate bonds or any kind of structured securities. There is no exposure to peripheral eurozone countries or the UK. Bonds are required to be listed and the share of issuers with a rating of 'AA' or above needs to be at least 25%.

### Multiple Supervision Underpins Control Framework

IFB Hamburg is supervised by BaFin as the national competent authority in cooperation with the Bundesbank. IFB Hamburg's risk reporting and management tools, including its stress testing capabilities, are adequate for the activities it undertakes. An additional layer of oversight is also exercised by the government of Hamburg through the Landesrechnungshof, an independent institution to review accounting and expenses of state institutions.

### Asset Quality

#### Sound Asset Quality but Some Concentration Risks

IFB Hamburg's low impaired loan ratio (below 1% for the last four years) reflects its robust asset quality. Its rental property portfolio is fully performing, and only a minimal share of its owner-occupied loan exposure relating to private individuals has defaulted.

However, the bank's loan exposure is concentrated regarding geography and property type, due to its focused business model. Its credit profile is comparable to a regional, mono-line residential real estate lender. IFB Hamburg works with a selected number of established real estate developers and has concentration risk in its loan book. The bank is also significantly exposed to the ultimate credit risk of its guarantor, as entities related to Hamburg are a key constituent of its treasury portfolio (around 30% at end-1H19).

The majority of IFB Hamburg's loans are granular, but the bank also has significant large loan exposures to some borrowers. However, the concentration is mitigated by strong asset quality. IFB Hamburg's key risk in the loan portfolio is a regional housing crisis, although this would ultimately be covered by the state's statutory loss absorption.

### Earnings and Profitability

#### Hamburg's Contribution Ensures Balanced Financial Result

IFB Hamburg is compensated by its owner for the costs of its promotional services, which are booked as a non-recurring expense. The bank receives a contractual interest-rate compensation for its real estate activities, which covers the difference between promotional lending and market rates. The value of this compensation can vary depending on the evolution of activities, refinancing and market rates and the bank received EUR20.3 million in 2018. Consequently, its net profit is always moderately positive. The bank's sources of income are concentrated, primarily in interest income from its real estate activities.

## Capitalisation and Leverage

### Comfortably Capitalised Due To Legacy Capital Contribution

IFB Hamburg is well-capitalised due to a legacy special contribution, dedicated to promotional housing from Hamburg, of EUR610.6 million. The level of capitalisation comfortably exceeds its SREP requirement and provides a robust buffer also under stressed scenarios. The bank calculates its credit risk-weighted assets under the standardised approach, which explains IFB Hamburg's high-risk density of 65% and its leverage ratio of 14.5% at end-2018 (14.0% end-1H19).

### Capitalisation is Ultimately Protected by Loss Absorption

IFB Hamburg's capitalisation has proved stable over the last five years, driven by moderate movements in its risk-weighted assets, and the bank does not expect a significant business growth in the future. Management's calculations on the impact of the revised Basel III framework could represent a significant drag on its reported capital ratios due to its real estate focus. However, its capital ratio is likely to remain above regulatory requirements with a safe margin. Ultimately its capitalisation is protected by Hamburg's loss absorption and, therefore, financial losses will not erode its capital base.

## Funding and Liquidity

### State Guarantee Ensures Stable Access to Capital Market Funding

In line with peers, IFB Hamburg is wholesale-funded and does not accept deposits from the public, as reflected in the high loan/deposit ratio. IFB Hamburg's funding benefits from the guarantee from its owner. Its liabilities benefit from Level 1 treatment for bank investors' liquidity coverage ratios.

IFB Hamburg has issued bearer bonds since 2013, but also covered a material share of its funding through KfW and debenture notes issued through private placements. It has since broadened its investor base. The bank's refinancing volume is moderate, between EUR500 million and EUR700 million a year.

### Adequate Liquidity Management

IFB Hamburg reported a sound liquidity coverage ratio of 150% at end-2018. It benefits from stable money inflows (state payments), little volatility in its credit business and good asset quality. The bank's liquidity portfolio has a high share of repo-eligible securities and unencumbered assets. Liquidity lines are provided by KfW and by Hamburg; the latter can act as liquidity provider of last resort. However, IFB Hamburg has not had to draw on this facility so far.

### Debt Ratings Aligned With IDR

IFB Hamburg's debt instruments are rated in line with its 'AAA' Long-Term IDR.

FITCH MAY HAVE PROVIDED ANOTHER PERMISSIBLE SERVICE TO THE RATED ENTITY OR ITS RELATED THIRD PARTIES. DETAILS OF THIS SERVICE FOR RATINGS FOR WHICH THE LEAD ANALYST IS BASED IN AN EU-REGISTERED ENTITY CAN BE FOUND ON THE ENTITY SUMMARY PAGE FOR THIS ISSUER ON THE FITCH WEBSITE.

Copyright © 2019 by Fitch Ratings, Inc., Fitch Ratings Ltd. and its subsidiaries. 33 Whitehall Street, NY, NY 10004. Telephone: 1-800-753-4824, (212) 908-0500. Fax (212) 480-4435. Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
